OBJECTIVE

Seeking an opportunity in the field of data analytics and AI/ML where I can apply my academic knowledge, showcase my analytical and technical skills, and contribute to organizational growth. I aspire to gain hands-on experience, continuously learn new technologies, and develop a strong professional foundation.

CORE SKILLS

Programming & Databases: Python, SQL, Excel  
AI/ML & Analytics: Predictive Modeling, EDA, Data Cleaning, Data Management  
Tools & Visualization: Power BI, Jupyter Notebook,  
Other Skills: Pro active learning, Documentation, Communication (Written & Verbal)

EDUCATION

|                                                  |           |
|--------------------------------------------------|-----------|
| <b>Masters of Computer Applications(Ongoing)</b> |           |
| PES UNIVERSITY                                   | 2024-2026 |
| <b>Bachelor of Computer Applications</b>         |           |
| ACHARYA INSTITUTE OF GRADUATE STUDIES            | 2021-2024 |
| CGPA: 8.77                                       |           |
| <b>Higher Secondary (PUC- class Xii)</b>         |           |
| BGS PU COLLEGE                                   | 2019-2021 |
| 93.4%                                            |           |
| <b>SSLC (CLASS X)</b>                            |           |
| SOUNDARYA HIGH SCHOOL                            | 2019      |
| 94.3%                                            |           |

ACADEMIC PROJECTS

- Plant Health Prediction Project
- Designed and implemented Random Forest and XGBoost models using environmental features (humidity, temperature, soil conditions) to classify plant health.
  - Achieved 95% accuracy, showcasing the effectiveness of ensemble methods in agricultural data-driven decision-making.
- Global Salary Analysis with Dashboard
- Analyzed global salary datasets (Kaggle & public sources) using Python (Pandas, NumPy, Scikit-learn) and applied ML models; Random Forest delivered best predictive performance.
  - Created interactive dashboards with Matplotlib, Seaborn, and Power BI to visualize salary distributions, regional disparities, and key influencing factors for business insights.

ADDITIONAL INFORMATION

- Languages:** English, Hindi, Kannada.
- Certifications:** Machine Learning with Python course - GreatLearning Academy.
